

TECHNICAL PROPOSAL: EU, Here With You (HWY) Impact Assessment (2026–2027)

1. Understanding of the Assignment

1.1 Context and Background

The European Union (EU) in Cambodia is implementing the multi-year communication and visibility campaign "**EU, Here With You**" (**HWY**). This initiative targets Cambodian youth (ages 18–35) across urban, peri-urban, and rural areas to strengthen EU awareness, recognition, and perception. This assignment serves as the official recurring impact study to measure campaign performance and guide strategic communication adjustments through December 2027.

1.2 Specific Objectives

The study assesses the effectiveness of the campaign through several key lenses:

- **Campaign Impact:** Measuring awareness, recall, and recognition of visuals and messaging.
- **Brand Association:** Evaluating the link between campaign content and the European Union.
- **Visibility:** Identifying reach across audiovisual, digital, and outdoor channels.
- **Credibility:** Assessing the perceived relevance and credibility of the messages delivered to the youth.
- **Contextual Indicators:** Assessing general EU trust, perception, and recognition of thematic areas such as education, environment, and clean water.

2. Methodology and Study Design

2.1 Longitudinal Survey Structure

The study follows a repeated cross-sectional design across four survey waves, occurring approximately every six months:

- **Wave 1:** June 2026.
- **Wave 2:** December 2026.
- **Wave 3:** June 2027.
- **Wave 4:** November/December 2027 (to be completed before Dec 19th).

2.2 Controlled Convenience Sampling

To ensure operational agility without a sampling frame, we utilize a **non-probability convenience sampling method** with the individual as the primary sampling unit.

- **Target Sample:** \$N=500\$ individuals per wave to provide statistically meaningful results.
- **National Coverage:** Surveys will cover both urban and rural Cambodian youth countrywide.
- **Strategic Intercepts:** To reach the diverse 18–35 demographic, interviews will be conducted at universities, garment factory zones, and rural community markets across varied time-blocks.
- **GESI Quotas:** Hard quotas will be enforced for gender (50/50), age (18–24, 25–29, 30–35), and geography (30% Capital, 30% Secondary Urban, 40% Rural).

3. Scope of Work and Measurement

3.1 Measurement Framework

The study combines quantitative survey data with light qualitative insights where relevant to provide a comprehensive view of campaign impact.

- **Main Indicators:** Awareness/recall of "EU, Here With You," recognition of campaign visuals, association with the EU, and visibility across communication channels.
- **Secondary Indicators:** General EU brand awareness, recognition of EU activities in Cambodia, perceived relevance of support, and youth media consumption habits.

3.2 Questionnaire and Data Collection

- **Language & Tone:** Questionnaires are developed in English for approval and implemented in youth-friendly, accessible Khmer.
- **Content Consistency:** Core questions are maintained across waves to allow for accurate longitudinal comparison.
- **Visual Testing:** The instrument incorporates message and visual recognition testing to verify true exposure.
- **Data Collection Mode:** A hybrid approach using face-to-face computer-assisted personal interviewing (CAPI) and digital/mobile surveys via platforms like KoboToolbox.
- **Quality Control:** Implementation of real-time GPS tracking, timestamp audits, and 10–15% back-checks to ensure data validity.

4. Econometric Impact Evaluation

To isolate the campaign's effect from external variables, we utilize a two-step quasi-experimental process:

- **Propensity Score Matching (PSM):** Matches "exposed" youth to "non-exposed" peers based on demographics and media habits to create a balanced comparison group.
- **Difference-in-Differences (DiD):** Estimates causal impact by comparing perception changes between waves:

$$Y_{it} = \alpha + \beta_1 \text{Exposed}_i + \beta_2 \text{Post}_t + \beta_3 (\text{Exposed}_i \times \text{Post}_t) + \gamma X_i + \epsilon_{it}$$

The coefficient β_3 represents the estimated impact of campaign exposure.

Figure 1 Conceptual framework

5. Detailed Financial Proposal

The total budget is fixed at **USD 21,265.00**, inclusive of all fees and taxes. This includes a **15% institutional cost** for project management and administrative overhead.

5.1 Cumulative Package Summary

Package Selection	Direct Operational Cost (85%)	Institutional Cost (15%)	Total Fixed Budget
Per Survey Wave	\$4,518.81	\$797.44	\$5,316.25
Two-Wave Package	\$9,037.62	\$1,594.88	\$10,632.50
Full Four-Wave Contract	\$18,075.25	\$3,189.75	\$21,265.00

5.2 Itemized Cost Breakdown (Per Survey Wave)

Category	Activity Description	Amount (USD)
Research Design	Methodology note, GESI-responsive questionnaire development (English/Khmer).	\$700.00
Fieldwork	Recruitment, training, data collection, and rural/urban travel nationwide.	\$2,700.00
Quality Control	Data validation, 10–15% back-checks, GPS tracking, and cleaning.	\$418.81
Analysis & Reporting	Comparative analysis vs. 2023 perception report and previous waves, actionable reporting.	\$700.00
Direct Subtotal	Subtotal for technical implementation	\$4,518.81
Institutional Cost	15% Administrative overhead and project management	\$797.44
Total Per Wave	Total cost inclusive of all fees and taxes	\$5,316.25

6. Deliverables per Wave

For each survey wave, the contractor will deliver:

1. **Methodology Note:** Serving as a reference for consistency.
2. **Approved Questionnaire:** Youth-friendly instrument in English and Khmer.
3. **Clean and Raw Anonymized Datasets:** Provided in Excel or other standard formats.
4. **Analytical Report:** Detailed findings on campaign impact, perception trends, and actionable insights for communications strategy (e.g., content to continue or stop).
5. **Presentation of Findings:** Delivered in PPT format or similar.

6. Profile

To be considered for the **EU, Here With You Impact Assessment**, the applicant company must provide the following documentation and proof of capacity:

1. Administrative & Legal Proof

- **Company Registration:** Valid legal registration documents for Cambodia (or international equivalent). Please see the attached file.
- **Company Profile:**

As a private not-for-profit institution, CamTech University distinguishes itself through its excellence in research, education, and community involvement, driven by a mission to catalyze personal growth and societal advancement. By providing immersive, work-integrated programs, CamTech equips its students with the practical skills needed for success in the workforce, fostering partnerships both locally and internationally to conduct applied research and innovation that aligns with Cambodia's development objectives. Through hands-on learning experiences and industry placements, CamTech nurtures aspiring leaders in technology and entrepreneurship, empowering them to effect positive transformations. With a strategic focus on addressing contemporary challenges in Smart Cities, Industry 4.0, and Digital Health, CamTech actively shapes Cambodia's trajectory towards a prosperous future.

The National Institute of Science, Technology and Innovation (NISTI), under the Ministry of Industry, Science, Technology and Innovation (MISTI), envisions becoming one of Cambodia's leading innovation centers. Its mission is to support industries and micro, small, and medium enterprises (MSMEs) through research, capacity-building, knowledge dissemination, and the provision of practical technical solutions. With extensive experience in strengthening MSME capacity across Cambodia, NISTI has trained thousands of enterprises over the years, focusing on key areas such as technology adoption, digital skills, innovation-driven growth, and industrial development. Leveraging its strong national networks, government partnerships, and accredited laboratories, NISTI delivers hands-on support that enhances business operations, improves product quality, and increases competitiveness in both local and regional markets. Guided by a strong commitment to advancing science and technology for socio-economic development, NISTI actively contributes to Cambodia's long-term economic development goals for 2030 and 2050, promoting sustainable growth and improved well-being.

Relevant Experience

CamTech University has strong experience in research, policy engagement, and staff capacity development, supported by a multidisciplinary team of experienced academic staff and researchers. Its expertise spans education, public health, organizational science, technology, artificial intelligence, data analytics, and social sciences. CamTech works closely with government and international partners to translate applied research into policy-relevant evidence and practical solutions, including direct engagement with the Ministry of Industry, Science, Technology and Innovation (MISTI) on projects supporting Cambodia's SME policy landscape and other science and technology-related policies. Through work-integrated research, industry-linked projects, and targeted training and workshops, CamTech strengthens staff research capacity while providing SMEs and policymakers with evidence-based insights aligned with Cambodia's national development priorities. In addition, CamTech has collaborated with a range of partners, including the Ministry of Education, Youth and Sport, Khmer Enterprise, the Asai Foundation, the International Labour Organization, UNICEF, IFAD, and Brighton and Sussex Medical School.

- **References:** A list of at least **two comparable research assignments** completed in the last five years, including client contact details for verification.

2. Technical Expertise

- **Proven Track Record:** At least **5 years** of experience in survey research, perception studies, or market research.
- **Methodological Design:** Demonstrated ability to design survey instruments, manage data collection across urban/rural Cambodia, and perform statistical analysis.
- **Sample Work:** Submission of previous reports or portfolios that demonstrate the ability to produce high-level insights in English.

3. Human Resources

- **Qualified Team:** CVs of the proposed team members, showing expertise in survey management and data analysis.
- **Field Capacity:** Evidence that the company can mobilize enumerators/surveyors for nation-wide data collection.

4. Team Composition and Management

To ensure technical rigor and operational excellence, the project will be implemented by a multidisciplinary team:

Project Team Leader: Dr. Ven Seyhah will provide overall strategic oversight, technical leadership, and final quality assurance for all project deliverables.

Data Collection Team: A dedicated group of 5–10 Enumerators will be deployed to conduct face-to-face and mobile-based interviews according to the established sampling protocol.
