ROI Calculator - AI Success Blueprint User Guide

Getting Started

Step 1: Accessing the Application

1. Navigate to the **AI Success Blueprint** platform using this link:
<https://success.visionacademy.one/?referral=PAD>
2. Create an account (new users) or Sign In (returning users).

Step 2: Account Registration (New Users)

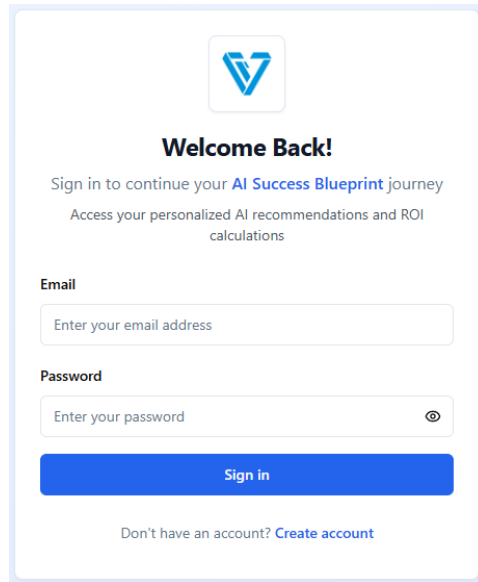

1. Click **Create Account**.
2. Complete the registration form
3. Click **Create Account**.
4. You will be automatically logged in and redirected to onboarding.

The screenshot displays the 'Create Your AI Success Blueprint' registration form. On the left, a sidebar contains the Vision Academy logo, the title 'Create Your AI Success Blueprint', a sub-header 'Join thousands of professionals transforming their businesses with AI-Powered Insights', a call-to-action 'Get started in under 2 minutes and unlock your AI potential!', and input fields for 'Full Name', 'Reference Code (Optional)', and 'Email'. The main form area on the right includes input fields for 'Company Name', 'Job Title', 'Country', 'Password', and 'Confirm Password', each with a placeholder text. A blue 'Create account' button is positioned below the password fields, and a link 'Already have an account? Sign in' is located at the bottom right.

Step 3: Login (Returning Users)

1. Enter your email and password.
2. Click **Sign In**.
3. You will be taken to your dashboard.

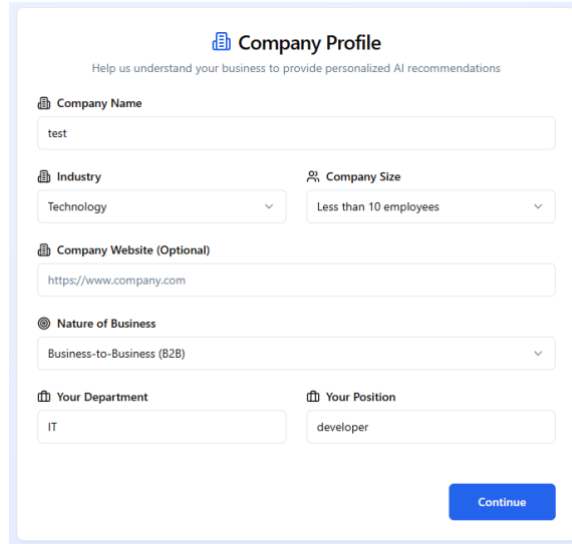

The login form is centered on a white background with a light blue border. At the top is a blue logo consisting of a stylized 'V' inside a square. Below the logo, the text 'Welcome Back!' is displayed in bold. Underneath, a message reads: 'Sign in to continue your [AI Success Blueprint](#) journey' followed by 'Access your personalized AI recommendations and ROI calculations'. The form contains two input fields: 'Email' with the placeholder 'Enter your email address' and 'Password' with the placeholder 'Enter your password' and an eye icon for toggling visibility. A blue 'Sign in' button is positioned below the password field. At the bottom, a link states 'Don't have an account? [Create account](#)'.

The AI Success Blueprint Onboarding

Stage 1: Company Profile Setup

Fill in your company profile.

The form is titled "Company Profile" with a subtitle "Help us understand your business to provide personalized AI recommendations". It contains several input fields: "Company Name" (text input with "test"), "Industry" (dropdown menu with "Technology"), "Company Size" (dropdown menu with "Less than 10 employees"), "Company Website (Optional)" (text input with "https://www.company.com"), "Nature of Business" (dropdown menu with "Business-to-Business (B2B)"), "Your Department" (text input with "IT"), and "Your Position" (text input with "developer"). A blue "Continue" button is located at the bottom right.

Click **Continue** once you fill in your company profile.

Stage 2: AI Success Blueprint: ALIGN

You will go through a 3 step assessment form.

Step 1: Challenges & Opportunities

- Select your external and/or internal challenges that your company faces.
- Elaborate your external and/or internal challenges.
- Enter custom challenges in the **Custom Challenges** field (optional).

AI Success Blueprint: ALIGN

Step 1 of 3: Challenges & Opportunities

🎯 **Challenges & Opportunities**

Select the areas where AI could help your business grow or improve efficiency.

External

☐ Increase Sales External

☒ 24/7 Customer Response External

☐ Enhance Customer Service External

Elaborate for External areas

Example: We currently struggle with manual customer support responses taking 2-4 hours, and we want to achieve sub-30-minute response times, so that we can improve customer satisfaction and reduce support costs.

Custom Challenges

Internal

☒ Visibility & Insights Internal

☐ Process Automation & Internal Productivity Internal

☐ Manpower Challenges Internal

Elaborate for Internal areas

Example: Our team spends 15+ hours weekly on manual data entry from invoices, and we want to automate this to under 2 hours per week, so that our finance team can focus on strategic analysis instead of administrative tasks.

Next

Definitions:

- **External** - customer facing processes
- **Internal** - Internal organisation-facing processes

Step 2: Risk Assessment

- **Internal Risks:** Select applicable risks and assign their level.
- **External Risks:** Select applicable risks and assign their level.
- **Other Risks:** Enter additional concerns in the text field (optional).

AI Success Blueprint: ALIGN

Step 2 of 3: Risk Assessment

Risk Assessment

Identify potential risks and their impact levels for your AI implementation.

Internal Risks		External Risks	
☐ Team resistance to AI adoption		☐ Providing wrong info to customers	
☐ Technical complexity		☒ Customer pushback to AI	High ▾
☒ Resource constraints	Medium ▾	☐ Info leak to competitors	
☒ Data privacy	Low ▾	☒ AI interactions unstable	Medium ▾

Other Risks

Describe any other risks not mentioned above...

Previous
Next

Step 3: Readiness Assessment

For each area (**Data, People, Systems, Resource**):

- Select readiness level (**High / Medium / Low**).
- Elaborate (optional).

AI Success Blueprint: ALIGN

Step 3 of 3: Readiness Assessment

✓ **Readiness Assessment**

Evaluate your organization's readiness across key areas.

Data Readiness ?

High

Systems Readiness ?

Low

People Readiness ?

Low

Resource Readiness ?

High

Elaborate:

Please provide additional context about your organization's readiness for AI implementation...

Previous

Complete Assessment

Click **Complete Assessment**.

Stage 3: AI Recommendations

Assessment Summary

- **Company Profile:** Recap of company information.
- **Challenges:** Selected challenges.
- **Account Details**

Risk Mitigation Strategies

Each risk includes:

- Title, severity badge, mitigation strategy, implementation steps, timeline, and required resources.

Readiness Improvement Recommendations

- **Data Readiness:** Steps to improve data quality.
- **People Readiness:** Training and change management strategies.
- **Systems Readiness:** Infrastructure and integration upgrades.
- **Resource Readiness:** Resources available for utilization.

AI Solution Recommendations

Each recommendation card includes:

- **Solution Name & Type**
- **Description & Potential Impact**
- **Why Recommended** (based on your assessment)

Interactive Features: Drag-and-drop prioritization, filtering, and detailed views.

Export as PDF: Generates a full report.

Click **Start AI ROI Calculator** to complete the onboarding.

Calculate Revenue ROI

Input Fields:

- Sales Channel: Text field (type of sales channel)

- Monthly Leads: Number of leads generated per month
- Conversion Rate: Current conversion percentage
- Average Deal Size: Dollar value per deal
- Sales Cycle: Length in days
- AI Solution Type: Text field (type of AI solution)
- Lead Volume Increase: Expected percentage increase in leads
- Conversion Rate Improvement: Expected percentage improvement
- Deal Size Increase: Expected percentage increase in deal value
- Sales Cycle Reduction: Expected percentage reduction in cycle time
- Monthly Solution Cost: Ongoing monthly operational costs
- Implementation Cost: One-time setup cost
- Infrastructure Cost: One-time infrastructure investment
- Training Cost: One-time training investment
- Customer Acquisition Cost: Cost to acquire new customers

Key Formulas:

- Current Monthly Conversions: $\text{monthlyLeads} \times (\text{conversionRate} \div 100)$
- Current Monthly Revenue: $\text{currentMonthlyConversions} \times \text{averageDealSize}$
- New Monthly Leads: $\text{monthlyLeads} \times (1 + \text{leadVolumeIncrease} \div 100)$
- New Conversion Rate: $\text{conversionRate} \times (1 + \text{conversionRateImprovement} \div 100)$
- New Deal Size: $\text{averageDealSize} \times (1 + \text{dealSizeIncrease} \div 100)$
- New Sales Cycle: $\text{salesCycle} \times (1 - \text{salesCycleReduction} \div 100)$
- New Monthly Conversions: $\text{newMonthlyLeads} \times (\text{newConversionRate} \div 100)$
- Projected Monthly Revenue: $\text{newMonthlyConversions} \times \text{newDealSize}$
- Annual Revenue Increase: $(\text{projectedMonthlyRevenue} - \text{currentMonthlyRevenue}) \times 12$
- Total Implementation Cost: $\text{implementationCost} + \text{infrastructureCost} + \text{trainingCost}$
- Annual Operating Cost: $\text{monthlySolutionCost} \times 12$
- Total First Year Cost: $\text{totalImplementationCost} + \text{annualOperatingCost}$
- Revenue ROI: $(\text{annualRevenueIncrease} \div \text{totalFirstYearCost}) \times 100$
- Payback Period (months): $\text{totalFirstYearCost} \div (\text{projectedMonthlyRevenue} - \text{currentMonthlyRevenue})$

AI Solution & Costs

Expected Automation Rate (%) *

Implementation & Training Costs *

Email Channel License Cost *

Chat/Messaging License Cost *

Voice Channel License Cost *

Input Fields:

Agent Types Array:

- Type (Manager/Agent)
- Count (number of people)
- Monthly Salary
- Daily Tickets by Channel:
- Email tickets per day
- Chat tickets per day
- Voice tickets per day
- Operating Hours: Start and end times
- Working Days Per Week: Number of operational days
- Weeks Per Month: Working weeks
- Fully Loaded Rate: Multiplier for total employee cost (typically 1.3-1.5)

AI Solution Costs:

- Email channel license cost (annual)

- Chat channel license cost (annual)
- Voice channel license cost (annual)
- Automation Rate: Percentage of tickets that will be automated
- Additional Costs: Other implementation costs

Key Formulas:

- Working Days Per Month: $\text{workingDaysPerWeek} \times \text{weeksPerMonth}$
- Working Days Per Year: $\text{workingDaysPerMonth} \times 12$
- Team Monthly Cost: Sum of ($\text{monthlySalary} \times \text{fullyLoadedRate} \times \text{count}$) for each agent type
- Daily Tickets Total: $\text{ticketsEmail} + \text{ticketsChat} + \text{ticketsVoice}$
- Monthly Ticket Volume: $\text{dailyTicketsTotal} \times \text{workingDaysPerMonth}$
- Annual Ticket Volume: $\text{monthlyTicketVolume} \times 12$
- Current Cost Per Ticket: $\text{teamMonthlyCost} \div \text{monthlyTicketVolume}$
- Total Solution Cost: $\text{channelLicenseCostEmail} + \text{channelLicenseCostChat} + \text{channelLicenseCostVoice} + \text{additionalCosts}$
- Daily AI Cost: $\text{totalSolutionCost} \div \text{workingDaysPerYear}$
- AI Cost Per Ticket: $\text{dailyAICost} \div (\text{dailyTicketsTotal} \times \text{automationRate})$
- Savings Per Ticket: $\text{currentCostPerTicket} - \text{aiCostPerTicket}$
- Annual Savings: $\text{savingsPerTicket} \times \text{automationRate} \times \text{monthlyTicketVolume} \times 12$
- Percentage Savings: $(\text{savingsPerTicket} \div \text{currentCostPerTicket}) \times 100$
- ROI: $((\text{annualSavings} - \text{totalSolutionCost}) \div \text{totalSolutionCost}) \times 100$
- Tickets Automated: $\text{annualTicketVolume} \times \text{automationRate}$

Input Fields:

- Process Name: Optional descriptive name
- Staff Involved: Number of people working on this process
- Average Monthly Salary: Per person monthly salary
- Hours Per Process: Time required for each process instance
- Process Instances Per Month: How many times process runs monthly
- Working Hours Per Day: Standard working hours
- Working Days Per Week: Operational days
- Weeks Per Month: Working weeks
- Implementation Cost: One-time setup investment

- Efficiency Gain: Expected improvement percentage (0.0-1.0)
- Error Reduction: Expected error reduction percentage (0.0-1.0)
- Annual Operating Cost: Yearly maintenance costs

Key Formulas:

- Monthly Time Savings: $\text{hoursPerProcess} \times \text{processInstancesPerMonth} \times \text{efficiencyGain}$
- Number of Hours Per Month: $\text{weeksPerMonth} \times \text{workingHoursPerDay}$
- Hourly Rate of Combined Staff: $(\text{averageMonthlySalary} \times \text{staffInvolved}) \div \text{numberOfHoursPerMonth}$
- Monthly Savings: $\text{hourlyRateOfCombinedStaff} \times \text{monthlyTimeSavings}$
- Annual Cost Savings: $\text{monthlySavings} \times 12$
- Net Annual Cost Savings: $\text{annualCostSavings} - \text{annualOperatingCost}$
- ROI: $((\text{netAnnualCostSavings} - \text{implementationCost}) \div \text{implementationCost}) \times 100$
- Payback Period (months): $\text{implementationCost} \div \text{monthlySavings}$
- Quality Improvement: $\text{errorReduction} \times 100$ (for display)
- Process Efficiency: $\text{efficiencyGain} \times 100$ (for display)
